VKK
ENTERPRISE INC.

CAPABILITY STATEMENT
Government & Public Sector

Modernize technology. Transform complex operations.

Software engineering. Document intelligence. AI automation. Managed delivery.

VKK Enterprise helps public-sector organizations and prime contractors modernize information-intensive operations, combining engineering breadth with particular depth in document intelligence and complex workflows.

CORE COMPETENCIES

Digital Transformation & Modernization

Technology assessments, modernization roadmaps, and process redesign.

Document Intelligence & Data Operations

Capture, classification, extraction, validation, and exception management.

Intelligent Automation & AI Solutions

Workflows, AI agents, copilots, business rules, and human review.

Software Engineering & Application Modernization

Custom applications, legacy modernization, APIs, and ongoing enhancement.

Cloud Engineering & Enterprise Integration

Cloud architecture, migration, and integration across enterprise platforms.

Technology-Enabled Managed Services

Application support, document and data operations, QA, and service reporting.

SELECTED EXPERIENCE

Bluefield State University

Awarded solution scope: ABBYY Vantage and SlateWorks AI Platform implementation for transcript intake, validation, checklist rules, exception review, and Ellucian Banner SIS integration.

VKK supplier engagement through Carahsoft’s cooperative purchasing and reseller channel.

Public-sector digitization & information processing

Delivery teams support MTA New York’s digitization initiative, Lake Wales Police Department’s modernization initiative, and Palm Beach County Sheriff’s Office document and information processing.

Engagements delivered through prime contractors.

WHY VKK

Engineer it.

Design and build applications, cloud environments, and integrations that connect enterprise systems and operational workflows.

Automate it.

Use the SlateWorks AI Platform to coordinate documents, AI, business rules, system integrations, and human review.

Operate it.

Combine specialized delivery teams, quality assurance, exception handling, and application support to sustain the resulting process.
